

# Consumer Credit Rates

**Nr. 149** valid as from 16/01/2023

## Instalment loans

The rates set out below are the annual debit rates and the annual percentage rates (APR).

**The debtor interest rate:** the rate of interest expressed as a fixed or variable percentage, applied on an annual basis on the part of the capital drawn down and which is calculated on the basis of elements approved and determined by the Royal Decree of 4 August 1992 regarding the costs, rates, duration and repayment of consumer credit.

**The APR (Annual Percentage Rate of Charge):** the rate which expresses the equivalent value, on an annual basis, of the present values of the commitments (current or future) of the lender (fees/levies) and of the consumer (repayments and the total cost of the loan for the consumer), and which is calculated on the basis of elements approved and determined by the Royal Decree of 4 August 1992 regarding the costs, rates, duration and repayment of consumer credit.

The rates are fixed throughout the term of the loan contract, without prejudice to the interest rate applicable in the event of a delay in payment.

Whatever the type of loan, the “**Standard**” or “**Basic**” rate structure is applied in relation to the client’s risk category. Such risk category is based on objective criteria, linked in particular to their capacity to repay the loan, their personal situation and the presence of any credit incidents.

For new cars and second-hand cars, there is also a “**Premium**” rate structure, applied on the basis of the same criteria. In addition, an Eco Car Loan rate structure is applicable in certain cases.

As a representative example: you take out a credit card ING Card overdraft facility, for an indefinite period and you withdraw (by paying, free of charge, with your credit card ING Card in the eurozone), the total amount of the overdraft facility, i.e. 2,000 euros, for a consecutive period of 3 consecutive months. Given

- a yearly credit card contribution of 27 euros,
- a monthly repayment of the interest owed,
- a mandatory monthly repayment of a minimum percentage of 10% of the total outstanding balance (i.e. the amount of the capital withdrawn and not yet repaid, including the debit interest) (minimum repayment: 25 euros or, where appropriate, the outstanding balance indicated on your account statement when it is less than 25 euros)
- and a repayment of the outstanding balance at 3 months after the date of the credit withdrawal

you will repay a total of 2.050,43 euros after 3 months.

In that case, the **annual cost percentage (A.C.P.)** is 11.49%.
