

ING MasterCard Business

ing.be/business

An ING Business MasterCard enables SMEs, the liberal professions and self-employed to simplify their business payments. You can use this card both in Belgium and abroad: at restaurants, for your trips, etc. But that's not all. The card can also be very useful for your online payments: to purchase office equipment or all sorts of supplies.

Convenience

With an ING Business MasterCard you can pay for your business spending worldwide, in particular at petrol stations, hotels and restaurants. It is accepted in over 170 countries at cash dispensers and shops displaying the MasterCard® logo. In addition you can also use this credit card to pay online easily.

Transparency

You will receive an overview of the transactions carried out by means of the cards linked to your contract. Furthermore with an ING Business MasterCard you can easily separate your professional and private spending.

Multiple holders

An ING Business MasterCard contract can include several credit cards which you can make available to your staff. Each cardholder will receive their own statement of expenditure and you will receive an overview of all the cards.

Cash always available

What if your clients fail to pay on time? With an ING Business MasterCard you will always have access to funds, without needing to go to your branch.

Accident insurance

Do you or your staff travel abroad for work? In fact your contract stipulates free "travel accident insurance" which safeguards you and your staff when travelling abroad. This insurance covers your trips by plane, train, boat, taxi or rental car provided they were paid for with an ING Business MasterCard and up to 200,000 euros¹.

Easy budget management

You will receive two types of monthly statements of expenditure:

- one statement of expenditure per card
- an overall statement showing all spending made with the various cards linked to the contract.

You can also consult the information online, via Business'Bank.

In addition you are free to set the Business MasterCard spending limit together with your ING adviser. According to requirements you can also apply for a separate limit per staff member (a minimum of 1,250 euros and a maximum of 300,000 euros).

Flexible repayment

The business current account to which the ING Business MasterCard is linked will be debited with the amount of transactions on a monthly basis. You will not pay any interest if you pay the bill by the 16th of the month.

With the utmost security

- The MasterCard SecureCode protects your online purchases. It is extra security for the password which secures the online payments you make with your ING Business MasterCard.
- In the event of loss or theft, call Card Stop as soon as possible on +32 (0) 70 344 344.

**Take advantage of an ING Business MasterCard now.
